

UK'S NUMBER 1 KNEE WALKER

WWW.STRIDEON.CO.UK

DESIGNED FOR MOBILITY

The StrideOn knee scooter has been designed to provide you with independence by supporting your lower non weight bearing leg safely. Its five wheel configuration gives you the most stable and safe platform with a unique turning capability.

The Orthomate with its pneumatic tyres enhances your freedom with a smooth and stable ride over uneven terrain.

SMALL & LIGHT

"Having needed and used the StrideOn myself, I consider both the product and the Company's service to be excellent."

Dr Mollie E Lord

We know you want to be able to go anywhere. Our knee walkers are designed to take as little space as possible. The lightweight frames are easy to carry, simple to fold and store.

When it's not in use pack it away or stow it in your car for travel.

StrideOn products provide you with peace of mind that no matter where you go your knee walker will go with you.

100% SUPPORT *ALL THE TIME*

Our knee scooters keep your healing limb comfortable, off the ground and raised out of harm's way at all times.

Use it like a scooter - it takes seconds to learn. Very useful around the home, shops or office. Take back your freedom!

Both the knee pad and handle bars are height adjustable, so you can adjust them to fit you. It's very comfortable to use and easy to adjust.

Keeping the healing limb off the ground is tiring on the thigh muscles and general posture.

With a StrideOn knee walker you can stand normally and get on with your everyday life.

ALTERNATIVE TO CRUTCHES

StrideOn helps sports people, the elderly, and everyone in between retain their independence and get on with day-to-day activities while recovering.

RECOMMENDED BY PROFESSIONALS

ORTHOPAEDIC SURGEON RECOMMENDS THE STRIDEON KNEE WALKER

Mr James Davis started a specialist foot and ankle service in South Devon and runs the South West Foot and Ankle Centre. As the only foot and ankle surgeon in South Devon, Mr Davis has gained extensive experience in the whole spectrum of adult foot and ankle disorders where he regularly recommends the StrideOn Knee Walker.

With endorsements from such reputable professionals, it is understandable how StrideOn is the most hired knee walker in the UK. We are incredibly proud to have designed such a prominent mobility product which has helped hundreds of people retain their freedom through the UK, Europe and as far away as Australia.

WATERPROOF CAST COVERS

Our waterproof leg cast and bandage protectors are designed to protect dressings and injuries while showering or bathing.

Keeps plaster casts, bandages & dressings dry whilst showering & bathing. 100% Waterproof cover protects your leg injury allowing you to bathe with peace of mind.

Simply slip the waterproof ring over your leg then pull down to form a protective waterproof seal.

The Cast Cover is designed to last the duration of your recovery, approximately 6-8 weeks. It is comprised of a heavy-duty vinyl and a non-latex membrane.

Suitable for men & women and can be worn on the left or right leg.
